

RI TRANSPARENCY REPORT 2020

Vinci Partners Investimentos Ltda.

An investor initiative in partnership with UNEP Finance Initiative and UN Global Compact

About this report

The PRI Reporting Framework is a key step in the journey towards building a common language and industry standard for reporting responsible investment (RI) activities. This RI Transparency Report is one of the key outputs of this Framework. Its primary objective is to enable signatory transparency on RI activities and facilitate dialogue between investors and their clients, beneficiaries and other stakeholders. A copy of this report will be publicly disclosed for all reporting signatories on the <u>PRI website</u>, ensuring accountability of the PRI Initiative and its signatories.

This report is an export of the individual Signatory organisation's response to the PRI during the reporting period specified above. It includes their responses to mandatory indicators, as well as responses to voluntary indicators the signatory has agreed to make public. The information is presented exactly as it was reported. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory to select are presented in this report. Presenting the information exactly as reported is a result of signatory feedback which suggested the PRI not summarise the information.

PRI disclaimer

This document presents information reported directly by signatories. This information has not been audited by the PRI Secretariat or any other party acting on their behalf. While this information is believed to be reliable, no representations or warranties are made as to the accuracy of the information presented, and no responsibility or liability can be accepted for any error or omission.

Usage restrictions

Public Transparency Reports are the intellectual property of PRI. Under no circumstances, can this report or any of its contents be sold to third parties.

Engagemen	t and ownership
Whenever w	e hold a relevant position in any company, we seek to engage with the following objectives:
	ote a dialogue with companies in order to better understand ESG challenges and opportunities; irage the adoption of best sustainability practices by companies;
- LIICUL	
 Encou 	irage better transparency about your performance on relevant ESG topics ve the level of monitoring about the investee companies' sustainable performance.

Exercise of voting rights (proxy voting)

In line with the recommendations of the Principles for Responsible Investment, we are committed to being active and diligent in voting at meetings. For this reason, we exercise this right in order to improve environmental, social and governance performance in invested assets. We understand that this approach

helps to generate value from a greater alignment of companies with the interests of shareholders. This role is put into practice by the managers of our funds.

The vote to be taken at meetings counts on the participation of analysts and managers, and will take place in accordance with our Voting Rights Policy. For ESG topics, we seek to speak out whenever the company represents a significant percentage of our funds and the content of the vote may affect the value of the assets held. Examples of ESG themes on which we can speak include:

Environmental: use of natural resources, waste management, effluents and atmospheric emissions, impacts on ecosystems and biodiversity, changes in climate.

Social: Health and safety, working conditions, relationship with communities, supply chain and relationship with customers:

Governance: transparency practices, remuneration of top management, respect for minority shareholders, quality of the board, among others.

LEA 02

LEA 02.1	Indicate the method of	f engagement, giving reasons for the interaction.		
Type of engage	ement	Reason for interaction

LEA 02.4 Additional information. [Optional]

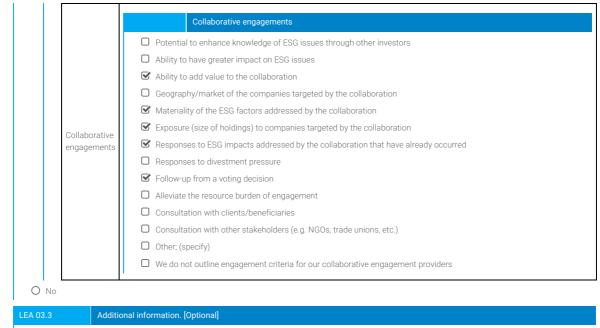

Engagement and ownership

Whenever we hold a relevant position in any company, we seek to engage with the following objectives:

- Promote a dialogue with companies in order to better understand ESG challenges and opportunities;
- Encourage the adoption of best sustainability practices by companies;
- Encourage better transparency about your performance on relevant ESG topics
- Improve the level of monitoring about the investee companies' sustainable performance.

Whenever possible and relevant, we act through collective engagement actions with other investors. This process involves the definition of specific engagement criteria to cover the largest possible number of investors within relevant topics for improving companies' ESG practices.

		Other; (specify)	
		We do not outline engagement criteria for our individual en	ngagements

Whenever we hold a relevant position in any company, we seek to engage with the following objectives:

- Promote a dialogue with companies in order to better understand ESG challenges and opportunities;
- Encourage the adoption of best sustainability practices by companies;
- Encourage better transparency about your performance on relevant ESG topics
- Improve the level of monitoring about the investee companies' sustainable performance.

Whenever possible and relevant, we act through collective engagement actions with other investors. This process involves the definition of specific engagement criteria to cover the largest possible number of investors within relevant topics for improving companies' ESG practices.

procedures recommended by ERM. VINCI believes that this new policy and procedures of responsible investment will enhance returns and better manage risks by:

- Incorporating ESG issues into investment analysis and decision-making processes;
- Incorporate ESG issues into ownership policies and practices;
- Seek appropriate disclosure on ESG issues by the entities in which the company invest;
- Promote acceptance and implementation of the principles within the investment industry;
 Work together to enhance the effectiveness in implementing the Principles; and
- Report on activities and progress towards implementing the Principles

- Not applicable, our organisation did not select any investments in the reporting year
- □ We do not track this potential impact

5.3 Additional informa

In the reporting period, ESG issues were considered but did not have an impact in our investment decisions or deal structures.

Our regular process states that if an ESG issue is identified, it has to be solved before the deal is closed, if the issue is too significant that it can't be resolved, we don't pursue the acquisition

local communities generating value for the investment such as sponsorship of local events and creating a relationship closer with the neighborhood (especially in the case of shopping malls investments) and municipalities. The governance aspect is usually analyzed during due diligence when Vinci has the ability to negotiate the deal structure and its rights. In the case Vinci has the right to determine the governance of the property after the acquisition, Vinci select and negotiates with partners, co-owners and service providers (asset and property manager).

While developing projects our intention is to achieve sustainable performance in the following topics: sustainability (assessment of the existing transportation facilities, availability of retail and service providers), energy efficiency (on project developments our consultants and engineers are briefed to select building systems and solutions to optimize energy consumption), use of sustainable materials (we work along with architects to create the building specs using), indoor air quality (we intend to offer out tenants an air quality that complies with all local regulations requirements), water management (if applicable, our properties are designed to achieve low water consumption per capita), waste management (we engage with general contractors that implement construction waste management plan), among others. Further, when designing our developments, we analyze the feasibility of Green Building Certifications. We usually engage with third party environmental consultants to assess the achievable levels of LEED certification and its benefits for the property.
